

Another Wonderful Discovery.

Electricity, telephones, airplanes and all the wonderful inventions of this scientific age seemed impossible a few years ago. But it seems there is nothing so impossible but what some scientist will discover the means of accomplishment. Prof. Emerson has now discovered a preparation which will really grow hair. Iowa people are amazed and astounded by Emerson's new discovery for the hair. Emerson said that one bottle of his new discovery would grow a full head of hair and restore gray or faded hair to its natural color. The people did not believe him. It was too much to expect and too good to be true. They had tried all the highly advertised hair restorers and had always been disappointed and they could not believe one bottle would really grow a full head of hair. But now comes the most startling part of all—for Emerson proved it—yes, absolutely proved it. What do you think he did? He made the bold and remarkable statement that he would give five dollars to any person who used one bottle of his new discovery and failed to secure a new and satisfactory growth of hair. The people were astounded by the unheard of offer, but they knew that Emerson was financially responsible and would do as he agreed if it cost him his fortune. Thousands bought bottles of his new discovery, though most of them had little faith and expected to be paid five dollars for using the bottle of new discovery. Out of the first thousand bottles sold only seven claimed they were not entirely satisfied, and they immediately received the five dollars without question. The rest of them were overjoyed to find that Emerson's new Discovery had really promoted a new and healthy growth of hair. What is this remarkable new discovery? Emerson won't tell, and chemists have tried to analyze it and have failed to find out what it is. Emerson asks us to publish this same offer to the readers of this paper. He states that with every bottle of his new discovery, the price of which is \$1, he will send a written agreement to pay you five dollars if you are not entirely satisfied with the result which is invariably a new head of healthy, vigorous hair. The new discovery is not sticky, oily or greasy and is very pleasant to use. This is the most remarkable offer ever made by a responsible firm such as the Emerson Chemical Co., which is backing Emerson in his offer. Just send a \$1 bill (money order not necessary) to the Emerson Chemical Co., Scottsbluff, Nebraska, and secure a bottle of the new Discovery and the agreement to pay you \$5 or grow a full head of hair with only one bottle of this new discovery.

The Gospel of Democracy.

Jefferson stated the whole gospel of Democracy in his sixteen propositions in his first inaugural address as president. He would, under no temptation, bend a power of the federal government downward to pick up a special private, local or sectional interest, and thus hatch a brood of special interests to feed on the general or common interests of the country. None knew as well as he this government has no independent reserve fund of property or of power out of which to make gifts or grant privileges. None knew better than he that all property and power in possession of our federal government are only concessions of the people; that to make gifts from this property is to ambush it away from the many to enrich the few; that to grant privileges out of power is to carve such grants out of the body of common rights. Hence the corner stone of his system was equality of natural rights among men, and equal title to security of such rights under the law.—St. Joseph Observer.

In Memory of Uncle Remus.

The work of the Uncle Remus Memorial Association, the organization formed in Atlanta, Georgia, shortly after the death of the late Joel Chandler Harris, has received impetus from the fact that Mr. Roosevelt will visit Atlanta October 8 to make an address for the benefit of the association. The object of the Uncle Remus Memorial Association is to purchase, from the Harris heirs, the author's home, "Snap Bean Farm," located in a suburb of Atlanta, and to convert the place into a free kindergarten, a library, and playground for children. The work of the association is not purely local. The officers are endeavoring to make the movement international. No large sum of money is received by the association from any individual, for, since Mr. Harris was beloved by many, many will be allowed to help in the work of preserving his home as a memorial to him.—Collier's Weekly.

This is the time of year to put on a new or patch or repair a gravel roof. I have a full stock of gravel, pitch and paper for doing this work and will guarantee a first class roof. Can be put on right over tin or any other roof, thereby taking no risk in having a rain spoil the contents of your building. Will be glad to make estimates and can do this work at once.

Why "White-leaded" Means more than "Painted"

If all paint were made of pure white lead and pure linseed oil, the term "paint" would mean what most people think it means.

But as all paint is not so made, it is necessary to say: "I want my house 'white-leaded.'"

Why?—Because white lead paint, mixed at the time of painting to fit the requirements of the surface covered, penetrates the surface with minute tentacles, clings to it, and forms a tough elastic film on the outside which disintegrates slowly, uniformly, smoothly, evenly. That is—it doesn't scale or chip.

This paint is durable—it postpones repainting day, and never needs the steel scraper or gasoline torch before a new coat can be applied.

Woman Lawyer's Large Fee.

The largest legal fee ever given to a woman attorney was won by Miss Mary E. Miller, a Chicago attorney, when a jury in Judge Gibbons' court gave her a verdict for \$32,500. The verdict was against the heirs of the late John Bross, former Lieutenant-Governor of Illinois, whom Miss Miller represented in a will litigation.

To make her victory all the more complete Miss Miller conducting her own case, examining witnesses and making her own argument to the jury.

While Miss Miller's fee does not come near equalling in amount the enormous sums paid at different times to her brother members of the bar in Cook county and the country at large it establishes a new mark for women lawyers of the United States.—From the Chicago International.

Gov. Hadley successfully "straddled" the whiskey question in the last campaign, running with the brewers in the cities and the prohibitionists in the country. Can he turn the trick again? Pretty foxy guy, this Jay-hawker.—The Gallatin Democrat.

Miss Helen Potter returned to Kansas City Saturday evening after a brief visit here with relatives.

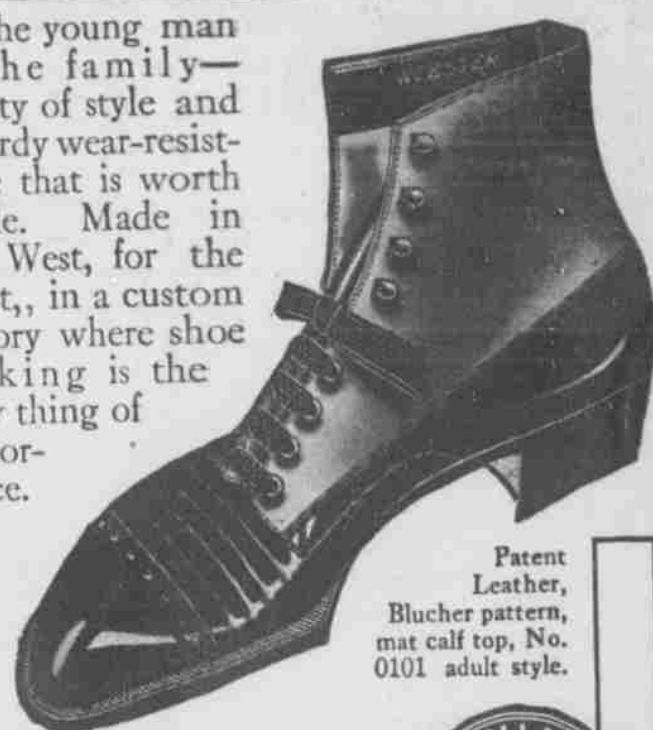

Mrs. Evan Young returned Monday from a visit in Kansas City and Liberty.

Walter Ford left Tuesday for a trip to Texas and New Mexico.
